

# Immersive Day..Wonderful Wednesday

Just like in KS1, the children have a fun filled day of exciting lessons led by our staff in Years 5 and 6 in their specialist subject areas – A day where we bring our learning to life in the pursuit of developing mathematicians, avid readers, fitness fanatics and engineers of the future. More often than not, the classrooms are made redundant and the children can be found 'out and about' embracing their love of learning.

## Outdoor Maths

Mrs Devlin leads fabulous outdoor maths investigations. There's not a textbook in sight when the children are off solving problems or investigating maths outside. Whoever said maths can be boring!

Mr Walker keeps everyone fit and healthy with his active PE lessons. Whether it be in the school yard, down at Park View or even at Chester-le-Street park, Mr Walker ensures everyone has fun whilst keeping healthy in a range of sporting activities. You never know, we might just find the next Mo Farah here at Cestria!

P.E.

## Reading Detectives

When the children do venture inside, they love diving into a good book during Mrs Marshall's Reading Detectives sessions. Here, Mrs Marshall shares her love of books exploring authors & texts from around the world. Each book they read leads them to a world of imagination, mystery & intrigue from the classics to the comedy of David Walliams.

DT/Maths And finally, our children absolutely love Mrs McGee's DT sessions. Who doesn't love designing, inventing and investigating how things work. Not forgetting the best bit when they get to visit our incredible invention shed and turn their ideas into reality.
