

Immersive Day..Terrific Tuesday

As well as having super children we also have super teachers who have their own skills and talents in certain areas that they like to share with the children. Every Tuesday, the teachers in years 1 and 2 swap classes to teach their specialist area. The children benefit from the teachers' own enthusiasm for the subject as well as their in depth subject knowledge too! Here's what we do...

Music

Mr Duncan loves music! He teaches the children all about different composers, they listen to different types of music but the best bit is when they get the instruments out! If you listen carefully you may just hear the children singing along while he plays his guitar!

Gymnastics

P.E.

Mrs Cutmore keeps our children fit and active with her super PE sessions. She teaches all the skills and techniques from the National Curriculum through fun games and team building activities. It's amazing to watch our children working together and the team spirit that they have.

RE

From visits to religious buildings, to organising special visitors into school, Miss Behenna works really hard to teach the children about the different religions and cultures of the world as well as promoting British Values.

With Mrs Taylor & Miss Cunningham the children learn skills + techniques, as well as key maths skills, in their super DT lessons. Miss Starke + Mrs Cowan let the children's imaginations run wild in our Invention Shed, a chance to invent and experiment (and have fun!)
